| Some simple rules for the "Addition Method"  |  |
|--|--|
| • if you get a false statement, the lines are parallel, so your answer is "no solution!"   |  |
| <ul> <li>if you get a true statement, the lines lie on top of each other; so your answer is "infinitely many solutions" because there are an infinite number of points that satisfy both equations! =O!</li> </ul> |  |
