

11/27/12 Warm Up

Solve by completing the square

$$\textcircled{1} x^2 - 5x + 3 = 0$$

Get into standard form  
( $ax^2 + bx + c = 0$ )

$$\textcircled{2} (2x+1)(2x-1) = 4x$$

$$\textcircled{3} \frac{w^2}{2} - w = \frac{3}{4}$$

Numbers 2 and 3 will help you on your homework so be sure to look back here if you get stuck!
